

THINK INSIDE THE BOX

MATOT

125
YEARS

of TIMELESS
FUNCTIONALITY

Old School Craftsmanship.

Since 1888 the Matot family has manufactured the most reliable and durable commercial grade dumbwaiters and vertical lift solutions available.

Backed by over a century of old world craftsmanship, we design and build every model on-premise. Our family-backed principles guarantee dumbwaiters that last longer than the lifetime of the building they are installed in. Matot vertical lifts are backed by a level of family-value quality and personal attentive customer service well beyond its competitors.

New Age Technology.

Matot's modern facility houses the latest in lift solution technology. We introduced state-of-the-art engineering in its infancy and continue to this day to constantly shape and enhance our products and improve our lead times. We build our distribution networks to guarantee controlled excellence in all areas from design and performance to installation and support.

Both our winding drum and traction dumbwaiters set the standard for technological superiority.

And Matot is the only company that-

- Designs units to run continually, limited only by the load/unload time and speed to deliver items.
- Offers clients solutions that lift virtually any items unlimited distances.
- Manufactures power operated doors and gates as well as counter loading and floor loading systems.
- Offers free designs and lifetime telephone tech support.

We handle all stages of product cycle from design through shipping on-site. So we can supply expertise and all maintenance and upgrade parts with quality assurance monitored 24/7, in both the U.S. and worldwide.

We **THINK INSIDE THE BOX** to provide unmatched product design, support and service.

What do you need to lift today?

Matot's extensive product line serves virtually every industry. Our depth of experience means we have a unique understanding of what unit, standard or customized, will be best for your project.

We can fit your needs based on what you want to lift, size of materials, available space, how far the contents need to go and how fast and how often.

Matot dumbwaiters offer benefits including:

EFFICIENCY

Keep employees at work stations instead of delivering materials between levels.

SAFETY

Reduce injuries associated with carrying heavy or dangerous loads between floors.
Control exposure to hazardous waste or materials.

FLEXIBILITY

Stop at floor level for cart loading or counter height for hand loading, with openings on different sides.

SPACE EFFICIENT

Consume less space and thus cost vs. an elevator. Allow more floor space for the building purpose.

LIFETIME UTILITY

Matot products will out-live the life of the building.

The smart money is in the box.

HEALTHCARE

FOOD SERVICE

RETAIL

COMMERCIAL

Our dumbwaiters are differentiated by LIGHT, MEDIUM and HEAVY duty lifting models.

- Net load capacities range from 100 pounds and up to fit your requirements.
- Standard car sizes start at 18" and up to fit your needs.
- Our units can lift from two to ninety stories, and up to 300 feet per minute.

Depending on model, counter or floor loading is an option, as well as single, opposite or adjacent side loading openings.

If it's Modernization or Customization that's needed, Matot is the expert.

INSTITUTIONAL

INDUSTRIAL

Solutions that save time and money.

Matot has created a completely automated solution for small-load material handling.

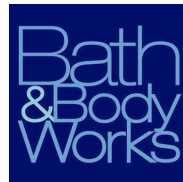

Our **Automatic Delivery System** couples high performance vertical lift systems with reliable horizontal transfer equipment.

A reliable and cost effective alternative to manual methods, materials are delivered automatically without dependence on operating personnel – no manual loading, unloading, or waiting. And, our system can be expanded and reprogrammed to suit changing material flow requirements.

Isn't it time you started to think inside the box?

Matot thinks inside the box for a growing number of valued clients.

In delivering the exact lift solution and specifications to meet our customer's needs, we stay involved and in direct communication from design through manufacturing, installation, service and support.

Thinking inside the box means our range of units and customization expertise will provide the exact unit and specifications you require.

Visit our Planning Center on our website and a drawing can be produced very quickly- within days.

**Matot is ready to think inside the box
and solve your lift solution needs.**
